

Folding Chapeau

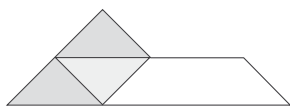

1 Open the napkin and fold it upwards.

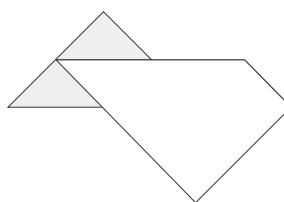

2 Fold the right lower corner topwards and the left upper corner downwards, till they meet at a virtual middle line.

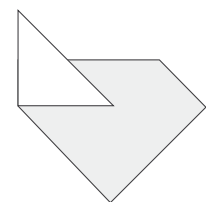

3 Turn the napkin. The former left lower corner is now at the right top.

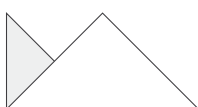

4 Fold half of the upper layer downwards.

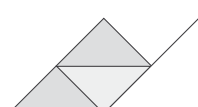

5 Take the right top triangle from the back side to the front and fold the right half completely downwards.

6 Take the left corner and fold it as indicated.

7 Fold the lower triangle back to the top.

8 Turn the napkin.

9 Fold the left top to the right side and put it under the right triangle.

10 Turn the napkin 180°. Hold the upper corner and put the lower tops outwards. Form the whole building to a hat (pull the inner fold a bit upwards) and arrange the folding on a plate.
